SILK JEWELLERY

READ YOUR WRIST SIZE HERE

Defining your bracelet size is rather personal, due to your personal preferences of wearing a bracelet rather tight or loose. On average we advise to add 1,5cm to 2cm for a silver bracelet to your wrist size and 1 centimeter for a leather bracelet.

WRIST SIZE GUIDE

BEFORE YOU BEGIN

For the most accurate wrist size, please review your printer setting first. Page scaling should be set to "none" and PDF prints at 100%. To confirm the precision of the printout, use a ruler to measure the 1 inch or 3 centimeter markers in the sample box. If this doesn't match exactly, your wrist measurement will be inaccurate.

HOW TO MEASURE YOUR WRIST SIZE

1. Print the wrist size guide and cut the paper wrist sizer.
2. With the number markers outside, curl the wrist sizer into a circle and carefully insert the pointed end just through the small opening at the end.
3. Place your wrist through the wrist sizer and gently pull the pointed end through the slit until the wrist sizer fits comfortably around your wrist.
4. The number that lines up with the arrow is your wrist size. If the measurement is between two sizes, refer the larger size.

ADDITIONAL NOTES

The wrist sizer will give you the approximation of your wrist size. Bracelet fit will vary depending on the type of bracelet and your personal preferences. For instance do you like to wear it rather tight or loose? Is it a bangle, a silver chain bracelet or a leather bracelet? On average we advise to add 1,5cm (0,59 inch) to 2cm (0,79 inch) for a silver bracelet to your wrist size and 1 cm (0,39 inch) for a leather bracelet.
